

Checking the Engine Oil

1. Park your motorcycle on its centre stand on a firm, level surface.
2. If the engine is cold, idle the engine for 3 to 5 minutes.
3. Turn the ignition switch off, stop the engine and wait 2 to 3 minutes.
4. Remove the oil fill cap/dipstick, wipe it clean.
5. Insert the oil fill cap/dipstick until it seats, but don't screw it in. Check that the oil level is between the upper and lower level marks in the oil fill cap/dipstick.
6. Securely install the oil fill cap/dipstick.
