

<b>(Ref.No.) Description</b>	<b>Function</b>
(9) Right turn signal indicator (green)	Flashes when the right turn signal operates.
(10) Immobilizer system (HISS) indicator (red)	This indicator lights for a few seconds when the ignition switch is turned ON and the engine stop switch is at $\bigcirc$ (RUN). It will then go off if the properly-coded key has been inserted. If an improperly-coded key has been inserted, the indicator will remain on and the engine will not start (page 40 ).
(11) HISS button	This button is used to flash the immobilizer system (HISS) indicator when the ignition switch is OFF (page 41 ).
