

## OPERATION PRE-RIDE INSPECTION

For your safety, it is very important to take a few moments before each ride to walk around your motorcycle and check its condition. If you detect any problem, be sure you take care of it, or have it corrected by your dealer.

### **WARNING**

Improperly maintaining this motorcycle or failing to correct a problem before riding can cause a crash in which you can be seriously hurt or killed.

Always perform a pre-ride inspection before every ride and correct any problems.

1. Engine oil level – add engine oil if required (page 31). Check for leaks.
2. Fuel level – fill fuel tank when necessary (page 28). Check for leaks.
3. Brakes – check operation;  
Front: Make sure there is no brake fluid leakage (page 21).  
Rear: Adjust freeplay if necessary (pages 23 – 24)
4. Tyres – check condition and pressure (pages 32 – 35).
5. Spokes and rim lock – check and tighten if necessary (page 82).
6. Drive chain – check condition and slack (page 77). Adjust and lubricate if necessary.
7. Chain slider – check slider wear (page 78).
8. Throttle – check for smooth opening and full closing in all steering positions. Adjust freeplay if necessary (pages 74 – 75).
