

Removal, Cleaning and Replacement:

Your motorcycle has an endless (reveted master link) type chain. It should only be removed or replaced by your Honda dealer.

When the drive chain becomes dirty, it should be removed and cleaned prior to lubrication.

1. Clean the side surfaces of the chain with a dry cloth. Do not brush the rubber O-rings. Brushing will damage them. Use of a solvent may also damage the O-rings.
2. Inspect the drive chain for possible wear or damage. Replace any chain that has damaged rollers, loose fitting links, or otherwise appears unserviceable.

Replacement chain:

D.I.D. 520V6 (KAI) or RK 520SMOZ2

Never use petrol or low flash point solvents for cleaning the drive chain. A fire or explosion could result.

3. Inspect the sprocket teeth for possible wear or damage. Replace if necessary.
4. Lubricate the drive chain (page 73).
