

## PARKING BRAKE

The front brake lever has a lock which allows it to be used as a parking brake.

Always set the parking brake when parking and before starting the engine.

Using the parking brake in freezing weather may cause the brakes to freeze in the locked position.

(1) Front brake lever

(2) Lock lever

To set the parking brake:

Squeeze the front brake lever (1) and lock it with the lock lever (2).

To unlock the parking brake:

Squeeze the front brake lever until the lock lever releases.
