

HELMET HOLDER

The helmet holder is located under the seat. The helmet holder is designed to secure your helmet and your passenger's helmet while parked. Do not operate the motorcycle with a helmet attached to the holder.

To use the helmet holder, remove the seat (page 39).

Route the helmet holder cable (1) through the helmet D-ring (2) and hook the loops of the holder cable onto the helmet holder (3).

Install the seat.

When the helmet holder is not used, attach one end of the holder cable to the holder with the other end routed under the rubber band as shown.

If you must carry an extra helmet while riding, use a commercially available elastic cord, strap or net to secure the helmet to the seat.
