

Intercom Volume Control Knob:**⚠ WARNING**

- ***Some local governments prohibit the operator from using a headset; always obey applicable laws and regulations.***

To communicate with the passenger using the intercom, turn this knob clockwise.

Turning this knob further increases intercom volume. When not using the intercom system, turn off this knob.

**NOTE:**

- The auto volume control does not function for the intercom system
- Turn this knob only high enough for adequate volume; if turned too high, there may be "feed back" from the fairing speakers.
