

Tire Recommendation

Off-the-road tires are standard on this model. Select the tires in accordance with the table below and check the tire pressure frequently.

Cold tire inflation pressure	Front: 17 psi (1.2 kg/cm ²) Rear: 20 psi (1.4 kg/cm ²)
Tire size	Front: 2.25-14 Rear: 3.00-12
Vehicle capacity load	80 lb (36 kg)

CAUTION:

- **Overinflation or underinflation of the tires will cause abnormal tread wear or other damage and create a safety hazard. Riding with underinflated tires will cause the tires to slip on the rims damaging the innertubes. Severe underinflation may result in loss of the tire from the rim.**
- **Check tire pressures frequently and adjust if necessary.**
- **Replace the tires when the tread depth at the center of the tire is less than 0.12 in. (3 mm).**
- **Periodically check the tire surfaces for cuts, abrasions and any other defects.**
