

# Load Limits & Guidelines

---

## Load Limits

Following are the load limits for your ATV:

There are limits to how much weight can be carried on your ATV and be pulled in a trailer.

The following load limits apply to standard equipment only. Modifying your ATV, using non-standard equipment, or riding on terrain that is not flat and smooth could further reduce these limits.

**maximum weight capacity**      386 lbs (175 kg)  
(includes the weight of the rider, all cargo, and accessories.)

**front cargo rack weight limit**      = 33 lbs (15 kg)

**rear cargo rack weight limit**      = 66 lbs (30 kg)

**tow weight limit**      = 500 lbs {225 kgf}

(Combined weight of the trailer  
and all cargo in the trailer)      (2206 N)

**tongue weight**      = 30 lbs {14 kgf}

(Weight on the trailer tongue)      (137 N) recommended

**tongue and rear cargo weight**      = 66 lbs (30 kg)

(Combined weight on the trailer  
tongue, on the rear cargo rack,  
and in the storage area)

Tongue weight can be measured with an ordinary bathroom scale. Place the scale under the tongue, using either a tongue jack or other support to keep the trailer level.

The weight of added accessories will reduce the maximum cargo weight you can carry.
