

## PARKING

Always choose a level place to park. After bringing your FOURTRAX to a stop, hold the brakes while you shift into neutral. Then set the parking brake and turn the ignition switch OFF (  $\circ$  ). If you're through riding for the day, also turn the fuel valve OFF.

If it is necessary to start the engine when your FOURTRAX is stopped on a grade in gear, rock the vehicle back and forth to allow shifting the transmission into neutral.

While reading this manual, remember:

### **▲WARNING**

**Indicates a strong possibility that serious injury or death may result if instructions are not followed.**
