

A concentration of antifreeze below 40 % will not provide proper corrosion and cold temperature protection. A concentration of up to 60 % will provide better protection in colder climates.

NOTICE

Using coolant not specified for aluminium engines or using ordinary tap water can cause corrosion.

Air Cleaner

This motorcycle is equipped with a viscous type air cleaner element.

Compressed air cleaning or any other cleaning can degrade the viscous element performance and cause the intake of dust.

Do not perform the maintenance. Should be serviced by your dealer.
