

SPARK PLUGS

Refer to the Safety Precautions on page 74 .

Recommended plugs:

DPR9EVX-9 (NGK)

NOTICE

Never use a spark plug with an improper heat range. Severe engine damage could result.

This motorcycle uses the spark plugs that have a platinum coated center electrode. Be sure to observe the following when servicing the spark plugs.

- Do not use wire brush to clean the electrodes. If the electrode is contaminated with accumulated objects or dirt, clean the electrode using a “plug cleaner”.

Consult your Honda dealer for this service.

- Use only “wire-type feeler gauge” to check the spark plug gap to prevent damaging the platinum coating of the center electrodes. Never use “leaf-type feeler gauge”.
- Do not adjust the spark plug gap. If the gap is out of specification, replace the spark plug with a new one.
