

**▲WARNING**

- \* Do not downshift when traveling at a speed that would force the engine to overrev in the next lower gear; the rear wheel may lose traction, resulting in a possible loss of vehicle control.

**CAUTION:**

- \* Do not shift gears without disengaging the clutch and closing the throttle. The engine and drive train could be damaged by overspeed and shock.
- \* Do not tow the motorcycle or coast for long distances while the engine is off. The transmission will not be properly lubricated and damage may result.
- \* Do not run the engine at high rpm with the transmission in neutral or the clutch lever pulled in. Serious engine damage may result.
