

WARNING

- The battery electrolyte contains sulfuric acid. Protect your eyes, skin and clothing. In case of contact, flush thoroughly with water and contact a doctor if electrolyte gets in your eyes.
- Batteries produce explosive gases. Keep sparks, flames and cigarettes away.

CAUTION

The battery breather tube must be routed as shown on the label attached on the tool box. Do not bend or twist the breather tube. A bent or kinked breather tube may pressurize the battery and damage its case causing electrolyte leakage.

Replace the battery if sulphation forms or sediments (paste) accumulate on the bottom.

BRAKE SHOES

Replace the brake shoes if the indicator plate aligns with the brake panel index mark when the front brake lever, rear brake lever or pedal is applied.
