

Tires & Tubes

Tire Replacement

The tires that came on your motorcycle were designed to provide a good combination of handling, braking, durability, and comfort across a broad range of riding conditions.

WARNING

Installing improper tires on your motorcycle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner's manual.

| | | |
|-------|----------------|------------------|
| Front | CRF125F | 70/100-17M/C 40M |
| | CRF125FB | 70/100-19M/C 42M |
| Rear | CRF125F | 90/100-14M/C 49M |
| | CRF125FB | 90/100-16M/C 51M |
| Type | bias-ply, tube | |

- Use a replacement tire equivalent to the original.
- Replace the tube any time you replace a tire. The old tube will probably be stretched and, if installed in a new tire, could fail.
- Have the wheel balanced after a new tire is installed.
- We recommend that tires be replaced by your dealer.
