

### Selecting the Engine Oil

For recommended engine oil, see “Specifications.” ➔ P. 117

If you use non-Honda engine oil, check the label to make sure that the oil satisfies all of the following standards:

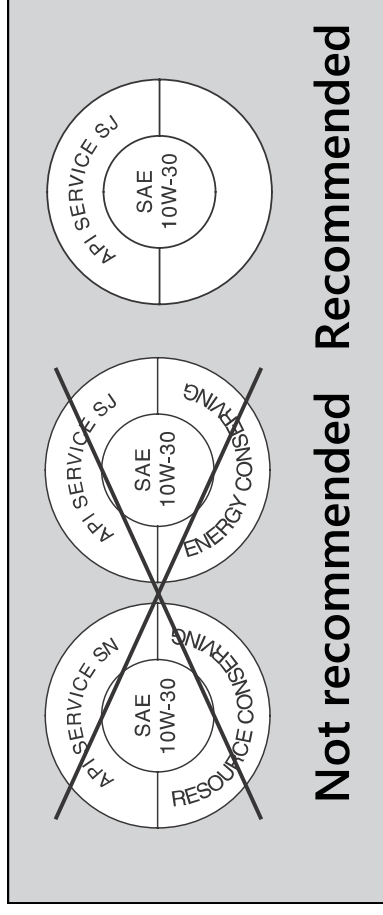

- JASO T 903 standard\*1: MA
- SAE standard\*2: 10W-30
- API classification\*3: SG or higher

\*1. The JASO T 903 standard is an index for engine oils for 4-stroke motorcycle engines. There are two classes: MA and MB. For example, the following label shows the MA classification.

\*2. The SAE standard grades oils by their viscosity.  
 \*3. The API classification specifies the quality and performance rating of engine oils. Use SG or

higher oils, excluding oils marked as “Energy Conserving” or “Resource Conserving” on the circular API service symbol.

### Brake Fluid

Do not add or replace brake fluid, except in an emergency. Use only fresh brake fluid from a sealed container. If you do add fluid, have the brake system serviced by your dealer as soon as possible.
