

## Tire Replacement

The tires that came on your CRF were designed to provide a good combination of handling, braking, durability, and comfort across a broad range of riding conditions.

### WARNING

Installing improper tires on your motorcycle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner's manual.

|       |                |       |
|-------|----------------|-------|
| Front | 80/100-21 51M  |       |
|       | DUNLOP         | MX3SF |
| Rear  | 100/90-19 57M  |       |
|       | DUNLOP         | MX3S  |
| Type  | bias-ply, tube |       |

- When replacing, use the original equipment tires or equivalent tires of the same size, construction, speed rating, and load range as the original.
- Replace the tube any time you replace a tire. The old tube will probably be stretched and, if installed in a new tire, could fail.
