## Parking

Look for a level parking area with a firm surface. Avoid parking on a slope or on loose or slippery surfaces when possible. If you must park on a slope, block the wheels to help keep the vehicle from sliding.

After bringing your vehicle to a stop:

- 1. Keep your foot on the brake pedal while you shift into neutral (N).
- 2. Set the parking brake.
- 3. Turn the ignition switch to the OFF (O) position, and remove the key.
