Tire Puncture ► Removing Wheels

- 6. Release the parking brake.
- **7.** Remove the mounting bolts and remove the parking brake caliper.

- **8.** Loosen the rear axle nut, lock nuts and turn the adjusting bolts so the rear wheel can be moved all the way forward for maximum drive chain slack.
- **9.** Remove the drive chain from the driven sprocket by pushing the rear wheel forward.
- 10. Remove the rear axle nut and washer.
- **11.** Remove the rear axle shaft, brake caliper bracket, rear wheel and side collars.
 - Support the brake caliper assembly so that it doesn't hang from the brake hose. Do not twist the brake hose.
 - Avoid getting grease, oil, or dirt on the disc to pad surfaces.
 - ▶ Do not push the brake pedal while the wheel is removed.
 - ▶ Do not pull the parking brake lever while the wheel is removed.
