

# Seat Belts

---

Your Honda SXS is equipped with lap/shoulder seat belts in each seating position. A seat belt keeps you connected to the vehicle so you won't be thrown out during a crash or rollover. Together with a proper helmet, a seat belt is your best protection against serious injuries in any type of crash, so make sure all occupants always buckle up before driving.

## **3 WARNING**

**Not wearing a seat belt, or wearing one improperly, can result in serious injury or death in a crash or rollover.**

**Make sure the driver and any passengers always wear their seat belts properly.**

Of course, seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.
