

Appearance Care

Aluminum Wheel Maintenance (SXS1000M3D/M3L/M5D/M5L [Aluminum wheel model])

Refer to *Safety Precautions* on page 123.

Aluminum may corrode from contact with dirt, mud, or road salt. Clean the wheels after driving through any of these substances. Use a wet sponge and mild detergent. Avoid stiff brushes, steel wool, or cleaners containing abrasives or chemical compounds.

After washing, rinse with plenty of water and dry with a clean cloth. Then apply a mild, commercially available spray cleaner/polish or wax.

For stained or dull-looking wheels, use a quality chrome/aluminum polish to restore the finish.

Exhaust Pipe and Muffler Maintenance

Refer to *Safety Precautions* on page 123.

The exhaust pipe and muffler are stainless steel but may become stained by mud or dust. Make sure no flammable materials or debris are sticking to the exhaust system. If any flammable materials or debris is found, remove it.

To remove mud or dust, use a wet sponge and a liquid kitchen abrasive, then rinse well with clean water. Dry with chamois or a soft towel.

If necessary, remove heat stains by using a commercially available fine texture compound. Then rinse by the same manner as removing mud or dust.
