

Emission Control Systems

Problems That May Affect Exhaust Emissions

If you are aware of any of the following symptoms, have the vehicle inspected and repaired by your dealer.

Symptoms:

1. Hard starting or stalling after starting
2. Rough idle
3. Misfiring or backfiring during acceleration
4. After-burning (backfiring)
5. Poor performance (driveability) and poor fuel economy

Federal regulations prohibit removing or disabling a device or element of design that may affect your engine's emission performance unless your Honda will be used exclusively in competition. If you modify your engine for use in sanctioned competition events, you must deface or destroy the emission control information label.

If you loan, sell, or give your competition modified Honda off-road utility vehicle to someone else, according to applicable law, you must inform the new owner/operator in writing that the vehicle is to be used for competition only.
