Is Your ATV Ready to Ride?

Pre-ride Inspection

Check the following items before you get on the ATV:

Engine Oil	Check the level and add oil if needed (page 102). Check for leaks.
Fuel	Check the level and add fuel (page 97) if needed. Also make sure the fuel fill cap is securely fastened. Check for leaks.
Tires	Use a gauge to check the air pressure. Adjust if needed. Also look for signs of damage or excessive wear (page 126).
Drive Chain	Check the condition and slack. Adjust and lubricate if needed. Also check the chain slider and chain roller for wear and replace if needed (page 135).
Nuts & Bolts	Check the wheels to see that the axle nuts are tightened. Use a wrench to make sure all accessible nuts, bolts, and fasteners are tight.
Underbody & Exhaust System	Check for, and remove, any dirt, vegetation or other debris that could be a fire hazard or interfere with the proper operation of the vehicle.
Leaks, Loose Parts	Walk around your ATV and look for anything that appears unusual, such as a leak or loose cable.
